

Taping has never been so easy!

## Taping Machine KTR 10

- The KTR 10 is a standard table-top Taping Machine
- Small, quick, reliable, cost-effective and thus absolutely economical: the perfect machine for efficient and cost-effective production
- The KTR 10 is a must for any cable harnesses production facility
- Cable harnesses can be taped in no time flat as the machine is simple to handle, easy to use and because the winding head can be quickly positioned
- Wherever cable harnesses have to be enclosed, KABATEC offers a solution in line with market requirements with the KTR 10 Taping Machine
- The compact design and versatility of this machine make it possible to meet your requirements quickly
- The components for our machines have been selected to guarantee virtually maintenance-free and reliable operation
- Our machines are customized to your product according to the type and requirements of your application
- This is possible because we can provide comprehensive in-house services ranging from project management, design and production to customer service
